Experience

Python Web Development Intern Jun 2025 – Jul 2025
Edubot

- Engineered AI TripMate, an AI travel planner that turns preferences into personalized destination recommendations and itineraries within a 2-month internship.
- Integrated 2 AI techniques, LLMs and vector embeddings, to generate context-aware itinerary content.
- Implemented semantic search matching traveler preferences to destination data across 3 layers: AI, backend, and frontend.
- Developed REST APIs connecting 2 tiers, a Flask backend and a React.js and TypeScript frontend; debugged and tested using Git.

Projects

CodeSense AI – Intelligent Code Review Platform *React.js, Node.js, Express.js, PostgreSQL, REST APIs, Generative AI*
GitHub: CodeSense-AI

- Created a code review platform combining 4 analysis modules: static analysis, complexity analysis, auto-documentation, and Generative AI review.
- Delivered automated multi-language analysis producing 3 review outputs: bug detection, quality assessment, and optimization recommendations.
- Built 3 backend services on Express.js: REST APIs, user authentication, and PostgreSQL review-history storage.

TaskFlow – Distributed Task Processing System *Node.js, Python, Redis, React.js, Docker, Message Queues*

- Architected an asynchronous job system spanning 2 runtimes: Node.js producers and Python workers connected through Redis queues.
- Orchestrated Redis queues with 3 reliability features: job scheduling, automatic retries, and live task monitoring.
- Containerized every service and worker with Docker, and visualized job status in 1 real-time React.js dashboard.

PrepWise AI – Intelligent Technical Interview Platform *Python, React.js, Node.js, PostgreSQL, Generative AI, LLMs*

- Designed an interview platform covering 3 assessment types: coding, technical, and system-design rounds.
- Automated 4 AI-driven features with Generative AI and LLM prompts: resume analysis, question generation, code evaluation, and feedback.
- Tracked candidate progress with 3 components: session management, PostgreSQL storage, and interactive analytics dashboards.

Education

SRM University, AP 2023 – 2027
B.Tech in Computer Science (AI & ML) *CGPA: 7.46/10*
Relevant coursework: Data Structures & Algorithms, OOP, DBMS

Narayana College, Andhra Pradesh 2021 – 2023
Board of Intermediate Education *92.8% (928/1000)*

Nirmala High School 2020 – 2021
Secondary School Certificate (SSC) *10/10 points*

Technical Skills

Languages: C, C++, Python, Java, TypeScript, JavaScript, SQL
Frameworks: React.js, Next.js, Node.js, Express.js, Flask
Databases: PostgreSQL, MySQL, MongoDB, Vector Databases
Tools: Git, GitHub, Docker, Redis, VS Code
Core CS: Data Structures & Algorithms, OOP, DBMS, Authentication & Authorization

Certifications

- Oracle Certified Professional: Java SE 17 Developer | Oracle | 2025
- MongoDB Associate Developer | MongoDB | 2026

Leadership

- Founded and led 1 independent university dance team, coordinating members and winning prizes at 2 competition levels: inter-college and university.
